# EXPOSED AGGREGATE CONCRETE

BEAUTIFUL  
PAVING  
MINUS THE  
MAINTENANCE

## *Exposed Aggregate Concrete*

### **EXPOSED AGGREGATE CONCRETE & HONED AND POLISHED CONCRETE**

Exposed Aggregate Concrete is attractive, naturally textured flooring that perfectly complements all landscape designs. It's perfect for areas that experience high levels of traffic and inclement weather. Unlike Liquid Limestone Paving, patterns or textures are not added to Exposed Aggregate Concrete, allowing the exposed smooth textures of aggregate to provide a naturally unique and appealing finish.

Honed and Polished Concrete is enjoying a surge in popularity, as homeowners seek to obtain the ultimate indoor/outdoor lifestyle balance. Our attractive selection of Honed and Polished Concrete combines the beauty and colour of polished stone with the practicality of concrete, resulting in a dramatic statement that's reminiscent of a chic European café or gallery.

No other flooring gives you such a stylish look in a wide variety of concrete colour options, allowing you to effortlessly offset all existing décor and design. For areas that require a non-slip surface, such as around pools, we recommend opting for a honed rather than a polished surface.

# *Exposed Aggregate Concrete*

This simple yet striking flooring solution combines coloured concrete with an exposed 'aggregate', which can be anything from quartz to blue metal. The combinations are unlimited, yet the result is always a hard-wearing, cost effective, visually striking surface that is suitable for numerous outdoor applications.

## THE BENEFITS OF EXPOSED AGGREGATE CONCRETE

- No anthills or weeds
- Strong and durable
- Non-skid
- Conforms to any shape
- Low maintenance
- Suitable for residential and commercial applications
- Reinforcing mesh throughout for strength and durability

## CARING FOR YOUR EXPOSED AGGREGATE CONCRETE

Exposed Aggregate Concrete is sealed with a solvent-based sealer providing the ultimate protection to your brilliant new surface. Minimal ongoing maintenance is required, and consists of simply cleaning and re-sealing your surface every two years. Measures are taken to minimise all cracking: any hairline cracks which appear do not require attention.

**ATTRACTIVE, NATURALLY TEXTURED  
FLOORING THAT COMPLEMENTS ALL  
LANDSCAPE DESIGNS.**

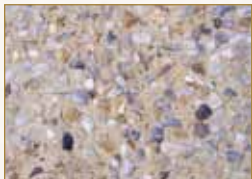

# Lifestone's Café Range

Black cement base with 100% quartz aggregate

*These colours may not be available in all areas. Many other colours are available, for more information you can talk to your Lifestone Paving representative.*

## Did you know?

- Pavers that have shifted or subsided can be hazardous.
- Paving that is uncomfortable to walk on can be annoying.
- A driveway covered in ant piles and weeds can take a whole Saturday to clean up.
- A backyard full of sand can end up inside over your lovely clean floors.
- An unfinished pool area can result in a pool full of sand.
- A BBQ area that you can't entertain in can be embarrassing.
- An outdoor area that you just can't relax in can be frustrating.

By installing Lifestone Paving's Liquid Limestone or Exposed Aggregate Concrete, you can avoid all of these time consuming and sometimes embarrassing, pitfalls.
